# TIPS ON PICKING PAPER

www.kiwilane.com

**With 5-6 sheets of double-sided paper you can create a beautiful 2 page layout and 1-2 cards using your scraps.**

- 2 Two sheets for your background. Use simple and subtle patterns, something that allows your pictures to stand out and that makes it easy to build your layers on.
- 1 One double-sided sheet for your main border. Look for the pattern you love the most and that preferably has all the colors included in the pattern. This pattern will help set the mood for your layout.
- 1-2 One or two double-sided sheets for your layers and accessories. If you're using single-sided paper, you will need two to four different coordinating patterns to work with.
- 1 One sheet to mat your photos. Feel free to pull in some coordinating cardstock where needed.
