Debbie modified this sketch to align with the number of pictures she wanted to scrapbook.

Instead of leaving your petals hanging on the page, try layering Beauty #7 on top of a paper mat. This seamlessly incorporates your Template into the design and makes it pop.

Add a personal touch by incorporating a title card into your design. Using the bottle (Beauty #5), you can trace and cut out a title card of your choice and plop a flower in. This adds personality and substance.

To add interesting shape and character to your page, consider using Nature Walk #8 to cut out your journal cards.

In the Details

Consider taking advantage of the Rings Set to help frame and shape title cards as well as bring attention to embellishments!

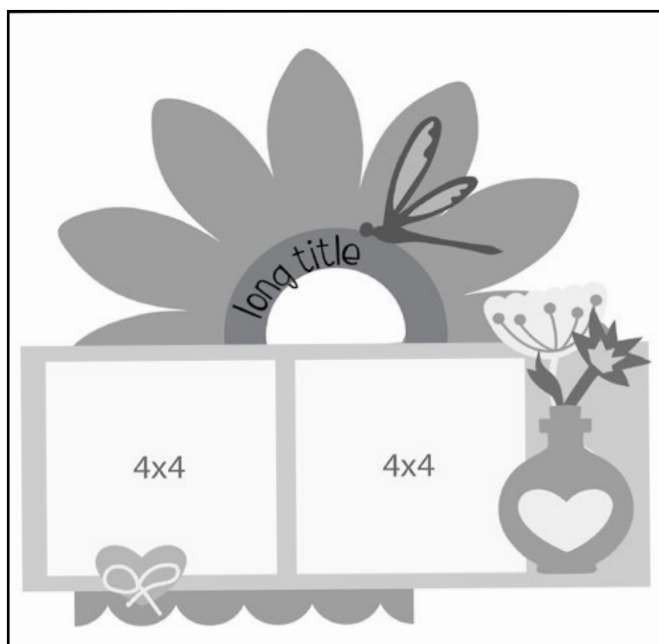

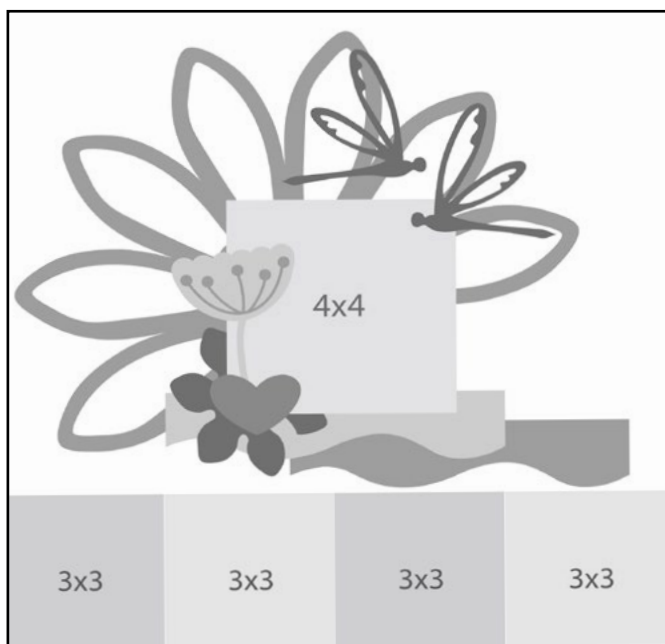

3D Jasmine was designed to pop on the page, making it a great addition to any floral arrangement. Try adding it for some dimension or tuck it behind a photo or border.

Mary Used 2 - one page sketch layouts to create her 2 page layout.

Add some texture and shine to the wings of the dragonfly (Beauty #1) by using the stencil feature to trace, cut, and add some galaxy glitz paper. You can also do this using any shimmering foil, lace, paint, or colored modeling paste. The options are endless!

Using the same stencil feature, you can also add texture by cutting out the centers of the large flower petals (Beauty #7) and replacing them with lace. Instead of replacing each section individually, adhere a whole piece of lace to the back of your complete Designer Template Cutout and then trim the excess off. This will save you cutting time.

Use some scalloped decorative scissors on the Frolic Tiny Border to add more character to that curvy edge. If that's not enough, layer any border of your choice with some ribbons or lace to give it more texture and dimension.

BEAUTY IN THE DETAILS

Add some fun details using Gold Glitter Paper and gel pens! You can fill the inside of your dragonfly wings with a paper or medium of your choice and outline the edges with a gel pen for an added pop of color.

Add a fringe to your flowers by gently cutting strips into their petals. This adds movement and interest to the page.

In the Details

Consider using a crimper to add texture to your leaves or vines.

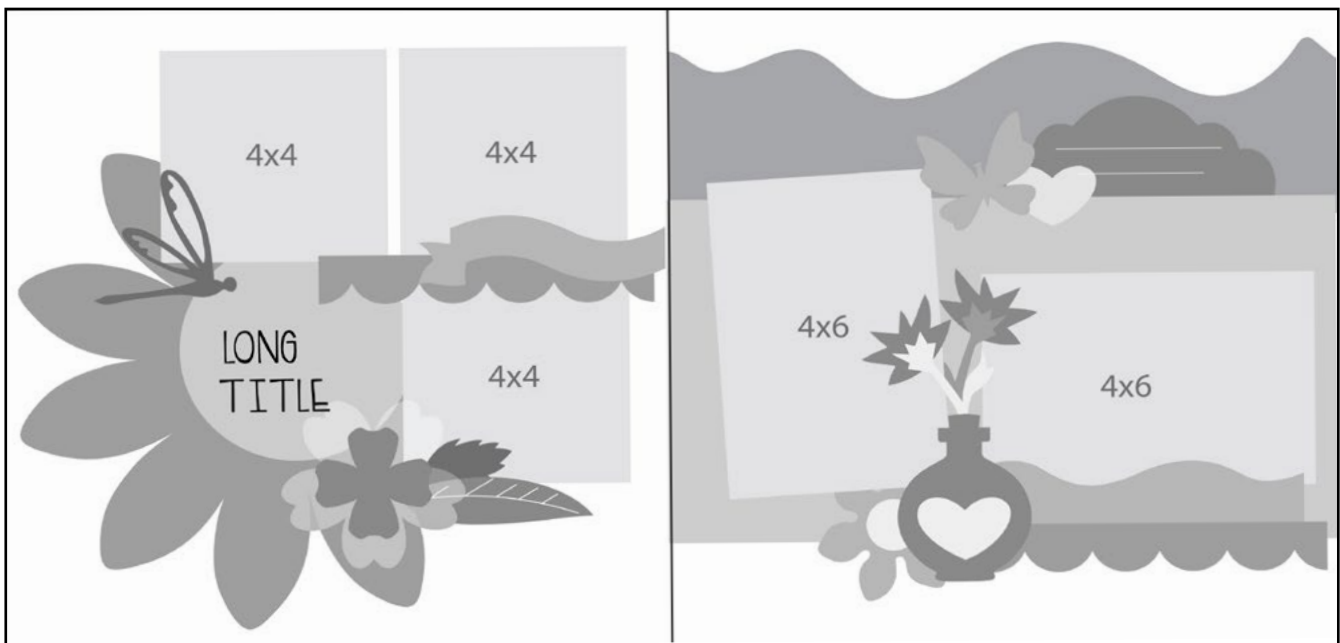

Change things up by layering The Beauty #7 Designer Template. Instead of filling in the holes and cutting off the excess, try layering this beautiful template and leaving a textured rim around the edges.

The options are endless when it comes to deciding how to accessorize the wings of your Dragonfly (Beauty #1). Want to add that mystical touch? Consider using vellum paper as wings to give it an enchanted look.

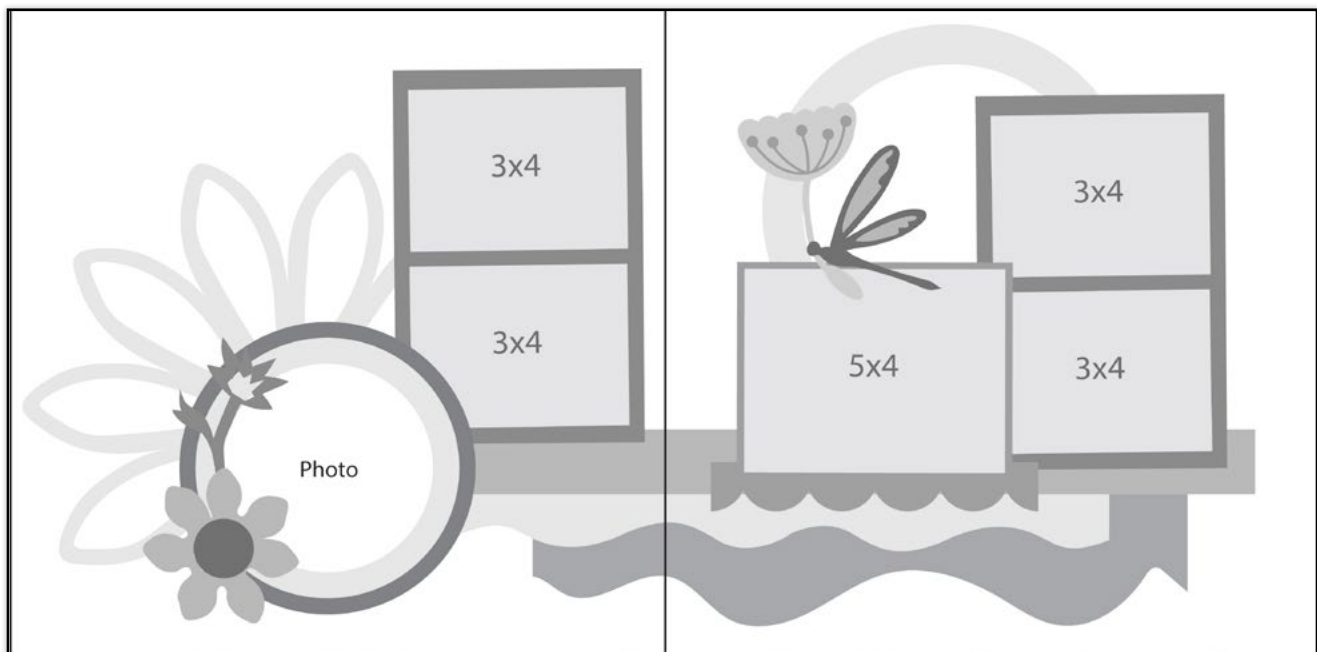

Instead of cutting out the center of the petals on your Beauty #7 Template, try filling it in instead. You can use the stencil feature and a gel pen of your choice to draw lines around the petal. This creates a more minimalist touch while also adding movement and layers.

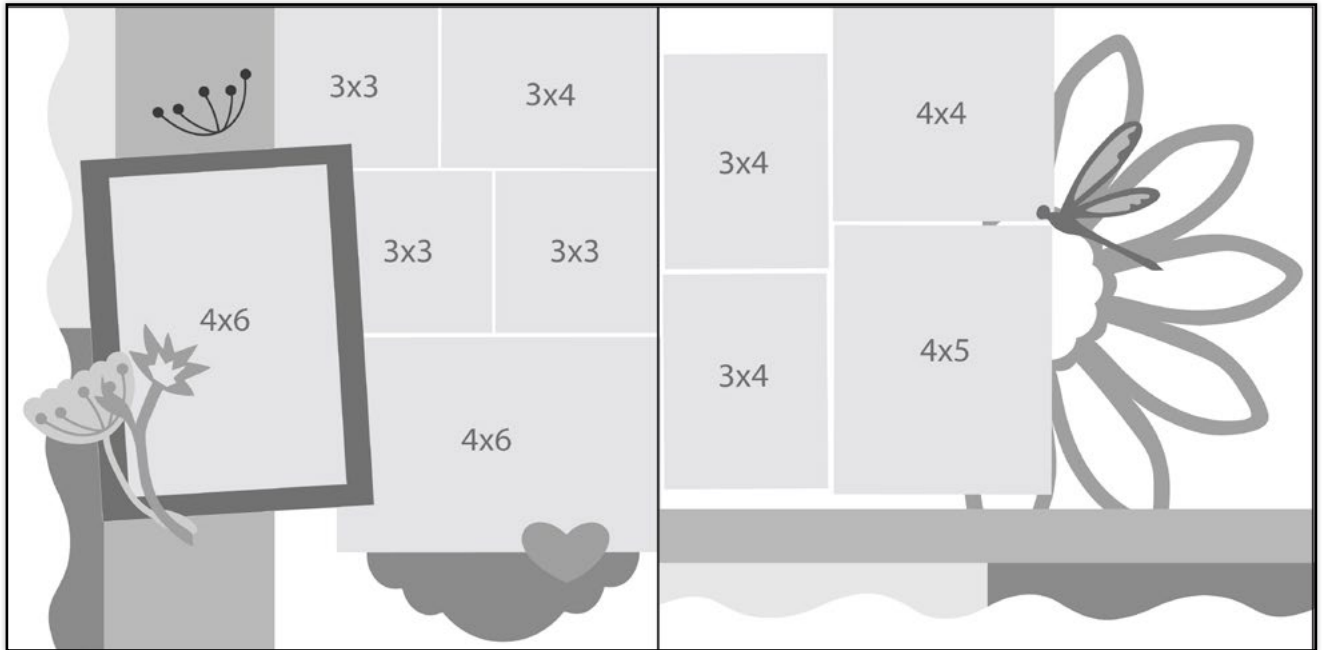

GUIDELINES FOR CREATING YOUR OWN PAGES:

- Start by selecting the sample that sparks your inspiration.
- Take into account the number of photos you wish to include and your paper preferences.
- Gather the templates mentioned in the layout spread's recipe.
- Arrange the templates to craft a layout tailored to the number of photos you intend to include. (Don't forget to use the photo templates for this step – they're a fantastic time-saving tool and help streamline your creative process.)
- Trace, cut, ink, and replace each layer with your chosen paper or the papers shown in the sample.
- Celebrate your finished page!

inspiration comes in the doing!

"Somehow I always find memories that work with the kit. I don't hold onto the kit for some future 'what if', special occasion. I decide on pictures and I make it work." -Debbie Bladh
